1. **Project Schedule:**

- Construction – 45 Calendar Days

2. **Liquidated Damages: \$1,285** for each calendar day that expires after the time specified.

**CSP 24-034 SA Street Reconstruction
PRE-PROPOSAL CONFERENCE AGENDA
July 31 at 10 a.m.**

G. Other Instructions

1. Evaluation Criteria –

Score	Description
70	Cost Proposal Price
20	Experience and Qualifications
10	Proposed Project Timelines

2. Retainage: (5%)

3. Bonding & Insurance –

- Bid Bond (5%)
- Performance (100%) Equal to Contract Amount
- Payment (100%) Equal to Contract Amount
- Insurance and Liability Coverage – Attachment 4

4. Prevailing wage rates: Davis Bacon Wage Rates – Prevailing Wage Schedule

5. General Contractor Registration with the City

6. Anti-Lobbying: Section 2.14

H. Technical Discussion – Project Managers and Engineers:

Contractor shall complete all work as specified or indicated in the plans, specifications, and contract documents. The work is generally described as follows:

Statement of Work:

- The project will include milling and overlaying from face of curb to face of curb of San Antonio Street from Walnut to Academy. The pavement design is based on the Terracon Pavement Engineering Report dated May 13, 2024 (attached for reference) and the work should be executed in accordance with the Terracon report as well as TxDOT Standard Specifications. Pavement Design option 3 from the Terracon report will be utilized for the project which consists of 2" TY C HMAC, 14" TY B. HMAC, and 6" of moisture conditioned subgrade.
- Based on the contractor's approach to the project, the contractor will be responsible for providing a signed and seal traffic control plan to the City for approval.

I. Questions and Answers:

The City's official response(s) will be provided in an Addendum released after the final date for questions.

John Cox – CONB

CSP 24-034 San Antonio Street Reconstruction Q&A

1. Is quantity for moisture treated subgrade (12030.00) CY correct? **This is an estimated quantity depending on the condition of the subgrade we may not need this line item.**
2. Can bottom lifts of TYB be bladed in **There is no rule against this however, it is preferred that it a paver is used. There is a maximum of 5 inch lifts for this project.**
3. Is testing performed by others **QC is the contractors responsibility however the city will be providing QA testing. The contractor is responsible for providing the RICE to the inspector to insure QA will be accurate.**
4. 20048 SY @ 6" I think would only be about 3300 CY not 12,030 CY **This is only an estimated quantity**
5. Constructability based on excavate 16", moisture condition 6" subgrade, 14" TYB in 3 lifts, and open to traffic each night is an issue. If testing is to be done on subgrade and each lift of HMA that would present additional constraints. To perform all this work in each work period would result in extremely short segments and difficulty getting paving machine in and out of a 16" hole. Even if bottom lift(s) bladed in; the amount of work required during each work period would result in very short segments. Just curious if anyone else has mentioned anything about it. **If Moisture treatment is needed exceptions may be made for open roadway but must still be ramped for businesses.**
6. Our question is if there was going to be 1 location for the entire 14-inch base repair and 2-inch Type C, or if there were going to be multiple locations. **This was for the entire project.**

PLEASE VISIT BIDNET FOR OTHER PUBLICLY RELEASED Q&A
